Continuation of Substance of Interview including description of the general nature of what was discussed: Examiner called Attorney to amend claims with the limitation of about  $10^7$  oC/s into the independent claims unless it could be shown a range could be supported through affidavit/declaration without introducing new matter was owned at the time of invention, which would place the case in condition for allowance overcoming the current rejection and 112, 2nd paragraph issue for relative term "rapidly cooled". Attorney initially wanted to amend the claim with above  $10^7$  oC/s; however, such an amendment could not be supported. Attorney agreed to the amendment "of about  $10^7$  oC/s" for the independent claims on 06/28/2010. Examiner appreciates Attorney's efforts in bringing this case in condition for allowance.
